

LEED (Leadership in Energy and Environmental Design)

CONTRIBUTION DATA SHEET

Albond and Albond FR can help earn certification points in the LEED. There are six categories within the LEED rating system. Albond and Albond FR can contribute toward certification under the following credit categories.

MATERIALS and RESOURCES

MR CREDIT 4 : Recycled Content (1 – 2 Points)

One point is awarded if the sum of post-consumer recycled content plus one half of the pre-consumer content is at least %10. A second point can be earned if the recycled value reaches %20.

MR CREDIT 5 : Regional Materials

Albond and Albond FR panels are manufactured using material sourced from numerous suppliers with varying recycled contents and manufacturing locations. Albond and Albond FR materials can not contribute points toward LEED certification based on regional materials. However other portions of the final Albond panel assembly may be able to contribute towards the regional materials credit.

INNOVATION and DESIGN PROCESS**ID CREDIT 1 : Innovation in Design**

Points are awarded for innovative design the requirements set by LEED. Points are available for innovative design per LEED requirements.
